

# SURVEILLANCE UPDATE

## Binge Drinking Among Adults: 2010 N.C. Behavioral Risk Factor Surveillance System

Percentage of people in N.C. who reported binge drinking, by gender: N.C. BRFSS 2010

Percentage of people in N.C. who reported binge drinking, by age group: N.C. BRFSS 2010

Percentage of people in N.C. who reported binge drinking, by educational attainment: N.C. BRFSS 2010

Percentage of people in N.C. who reported binge drinking, by income: N.C. BRFSS 2010

The North Carolina Behavioral Risk Factor Surveillance System (N.C. BRFSS) provides a critical source of public health data for understanding the scope of injury-related problems and measuring progress toward overall statewide goals. The North Carolina BRFSS Survey is a random-digit-dialing telephone survey of non-institutionalized adults, ages 18 and older. In 2010, 12,010 respondents completed the survey. Every year a core set of injury-related questions are asked. In 2010, injury-related questions were asked on topics regarding falls, seatbelt use, traumatic brain injury, and sexual and physical violence. This surveillance update includes data collected in 2010 on 11,945 surveys. Results presented here are for adults who reported binge drinking (males five or more drinks on one occasion or females having four or more drinks on one occasion). Percentages are weighted to population characteristics. See the N.C. BRFSS website for more information, specific details on item responses, and data limitations: [www.schs.state.nc.us/SCHS/brfss](http://www.schs.state.nc.us/SCHS/brfss).
